

Dr. Alexander Grinberg – Consultation Plans and Professional Services

My work focuses on identifying the most effective path forward for complex health and physiology related questions. For some people this involves direct clinical problem solving and improvement in function. For others it may involve advanced education, conceptual clarification, or strategic input on research and development.

To protect the quality of my work and my time, all consultations are paid services. This applies to patients and non patients, including individuals seeking education, healthcare professionals, and other professional or media related inquiries.

Who I Work With

Patient / Client – individuals seeking help with their own health situation

Advanced Biohacker – individuals with a high level of engagement in self directed health optimization

Physician / Clinician – healthcare professionals seeking advanced education or perspective

Biotech / Research – companies or teams needing scientific or translational input

Media / Podcast – interviews that involve detailed teaching or case based discussion

Other – situations that do not fit neatly into the above categories

All of the categories above are handled as structured, paid consultations when they require my time and expertise.

Clinical Consultation Plans (For Patient / Client inquiries)

Tier 1 – \$750

- 15 minute initial consultation
- Two 5 minute follow up calls
- Follow up calls valid for 6 weeks after the initial consultation
- AI generated transcript and summary of the consultation delivered via email

Tier 2 – \$1500

- 30 minute initial consultation
- Two 10 minute follow up calls
- Follow up calls valid for 6 weeks after the initial consultation
- AI generated transcript and summary of the consultation delivered via email

Tier 3 – \$2500

- 45 minute initial consultation
- Three 10 minute follow up calls
- Follow up calls valid for 6 weeks after the initial consultation
- AI generated transcript and summary of the consultation delivered via email
- Additional advanced support options tailored to your clinical situation can be clarified and agreed upon during the consultation

Tier 4 – \$3000

- 60 minute initial consultation
- Four 10 minute follow up calls
- Follow up calls valid for 6 weeks after the initial consultation
- AI generated transcript and summary of the consultation delivered via email
- An extended and more intensive level of individualized support for complex cases can be defined and structured during the consultation

Special Category – Extremely Rare or Highly Unique Health Issues

Some individuals have health situations that are extremely rare, highly atypical, or uniquely complex and may require a different level of time, research, and ongoing involvement than the standard tiers.

If you believe your case falls into this category, please describe this in your initial inquiry. If I believe I can help, the consultation structure and fees will be discussed and agreed upon individually before any meetings are scheduled.

Educational and Professional Consultations

These consultations are for individuals and organizations who are not seeking to become patients, but who want to learn from my work, clarify mechanisms, discuss complex cases at an educational level, or obtain higher level strategic input.

Standard fees for educational and professional consultations:

- \$750 for a 15 minute focused consultation
- \$3000 for a 60 minute consultation

For biotech, research, media, podcast, and other project based requests, scope and fees are confirmed by email before any online meeting.

How to Begin

- Visit <https://infinityepigenetics.com>
- Go to the Contact page
- Select the option that best describes your situation
- Provide a brief one paragraph summary of your request
- Submit the form
